Internship Experience

Sew Much Baggage

My name is Kaleigh Coon, and this year I interned at Sew Much Baggage. I am responsible for the overall maintenance of the way our store looks, handling customer relations, placing embroidery orders and letting people know when their orders have been completed. My favorite thing about Internship is helping people decide what colors and fonts coordinate the best with different

products like shirts and cups for different people. It lets me be creative with colors and fonts with real life applications. This program has helped me make decisions about my future by showing me what it is like to be an entrepreneur. In the future I plan on opening my own medical practice, and this experience has shown me some of the ups and downs of owning your own business. I have made connections with community leaders which will help me by giving me someone that I can always count on for a recommendation or guidance. My favorite moment during the Internship experience was when I made a suggestion to help our organizational system, and it was a hit! It is now the new way we do things, and it felt good to be the one to help everyone with something we do every day. The coolest thing I've done so far is learning how the machines work and the process behind embroidery.
